PROJECTS AND WORK EXPERIENCE

Work Experience:

2U | Full-Stack Web Development Teaching Assistant | Jun 2022 - Present

- Assist in the online delivery of a modern, full stack web development curriculum (ES6+, MySQL, React, RESTful APIs, MongoDB , PWAs, GraphQL)
- Role requires me to break down complex coding concepts, and simplify them to digestible bits for students.
- I conduct thorough code reviews for my students, and evaluate their code.

Century | Frontend Engineer | Feb 2022 - Jul 2022

- Taksed with re-writing Polymer.js code into React.js to modernize the web app.
- The role required me to fix existing bugs in the codebase, reducing the backlog for outstanding bugs
- Initiated a step-by-step onboarding process guide, for new junior devs joining the team

Wordpress Freelancer | Sept 2022 - Present

- Develop Wordpress websites for independent Portuguese business owners
- Develop lead and sales funnels to drive sales and leads to their businesses
- Generated paid traffic to businesses via meta advertisements, to drive sales in my clients online products and services

Volunteering:

Code Your Future | Nov 2021 - Feb 2022

- Responsible for teaching UK refugees and disadvantaged people front and back end web development alongside a large team of volunteers. The role demands proficient communication skills and patience. M.E.R.N tech stack used to teach students proficient web development

Projects:

Fictional University | Deployed Link: fictional.dylsonoliveira.com
Repo Link: github.com/Dylson14/fictional-university

- I created custom post types and custom fields, such as campuses, professors, programs etc. In addition, I created relationships between the post types, so users can navigate between them.
- I utilised JavaScript to implement a live search feature.
- I leveraged the Wordpress REST API, and let visitors sign up for a basic account on the website.
- I learned the fundamentals of converting static HTMl into a dynamic Wordpress template

Projects:
Custom theme | Deployed Link: customtheme.dylsonoliveira.com
Repo Link: github.com/Dylson14/wordpress-theme-tut-CodeCamp

- Using PHP, HTML, CSS and JavaScript, I was able to convert a static html file filled with hard-coded data and transform it into a dynamic Wordpress template, where users could dyanmically change the content of the website via the Wordpress admin

EDUCATIONAL HISTORY

Full-Stack Web-Development Bootcamp
University of Birmingham | May 2021 - Dec 2021

- Developed fundamental concepts in HTML, CSS, JavaScript, API Consumption, and utilising Git as version control.
- Engineered full-stack web apps with working servers and databases, all connected to the front-end.
- Obtained good practises for optimised code, utilised React and MongoDB to serve dynamic single-page applications.
- Collaborated with several peers to develop 3 deployed large coding projects.

BEng Mechanical Engineer (1:1)
Heriot-Watt University | Sept 2017 - May 2021

- Studied fluid mechanics, dynamics, strength of materials and thermodynamics. Involved demanding problem-solving discipline.
- Honed my ability to take complex knowledge and break them down into small digestible bits of information.

International Baccalaureate Diploma
Luanda International School | May 2015 - June 2017
